WATER RIGHT IMPAIRMENT SCREENING

1. Alternative evaluation.
2. For each reclamation alternative except for current discharges to marine water or land treatment.
 - A. Identify downstream water rights.
 - B. Identify downstream beneficial uses.
 - C. Identify hydrologic impacts to beneficial uses.
 - D. Notify general public and specific downstream right holders.
 - E. Public meeting/hearing @ utilities discretion.
 - F. Formulate any necessary mitigation (or enhancement) proposal to respond to identified impacts.

The Department hopes this process will identify potential impairments and is by no means risk free.
